Fund Manager Personal [Updated] 2022

[Download](#)

**Download**

Manage your investments from a safe, user-friendly, and efficient online platform. Set up, manage, and track all your investments from one convenient location. Fund Manager Personal offers robust support for multiple platforms (PC, Mac, iPad, iPhone), multiple currencies (domestic and international) and dozens of financial instruments. In addition, Fund Manager Personal is designed for portfolio optimization and risk management. For example, you can determine asset allocation, create a customized portfolio, set up target ranges for different allocations, and automate portfolio rebalancing. Key Features: Track your portfolio, from your bank account to investments in multiple currencies and financial instruments. Set up a number of portfolios, managed separately or together. Receive a graphical overview of your finances. Create or edit reports, graphs, and charts. Access investments from any online browser. Comprehensive portfolio optimization and risk

---

management. Create target ranges for different allocations. Automatically rebalance your portfolio when needed. Filter investment holdings to quickly analyze portfolios. Browse your portfolio's reports, graphs, and charts. Set up email notifications for all portfolio changes. Set up one-click alerts for portfolio, market, or asset allocation changes. Optimize and rebalance your portfolios using the "Find your best" optimization method. Access your portfolios from mobile devices. Optimize and rebalance portfolios with fixed monthly, quarterly, or annual targets. Generate portfolio reports, graphs, and charts. Support for multiple platforms (PC, Mac, iPad, iPhone), multiple currencies (domestic and international), and dozens of financial instruments. KEYMACRO is a specialized financial analysis tool designed for those who invest in the equity markets. It was developed by Quant Portfolio Managers and it offers a set of powerful features for investors, financial advisors, brokers and traders. What can you do with KEYMACRO? I. Your Equity Portfolio II. Interactive Equity & Asset Allocation III. INTERACTIVE MARKET & MONEY PRICES IV. Portfolio Performance V. Risk-Monitoring VI. Watchlist & Trade Alerts VII. Customizable Currency & Indices VIII. Bookmarking/Favoriting/Copy-Pasting IX.

---

Sending/Receiving Email X. Customized Reports XI. Interactive Charts XII. Support for multiple accounts XIII. Multiple Currencies XIV. Backtesting

What is KEYMACRO? The tool was developed by Quant Portfolio Managers and it is specifically designed to handle an investor's personal equity portfolio. It's developed with the intent to offer high-quality financial analysis for the financial analyst, brokerage, investor and financial advisor. I needed to get data out of our external database to build a tool that would extract data from that database. After creating a database using SQL Server, it was easy to get data from it into text files. It is important to have a consistent data format so that when the data is parsed, it can be correctly understood by the SQL Server. In this case, the data in the text file was created by another external application. Here, I used the FSO (Flexible Sequential Object) library to read data from that text file into a data structure that could be used by SQL Server. The FSO library was introduced in SQL Server 2012 and has been very successful, allowing people to read data from various formats (CSV, SQL, XML, text) and import it into

---

SQL Server. Another important aspect of this project was that I needed to read data directly into an SQL Server data table. I didn't want to write my own code to do this. I used the SQL Server Import and Export Wizard, and it worked perfectly. This tool is part of SQL Server Management Studio, but I've also used it from Visual Studio 2012. A SQL Server Import and Export Wizard is easy to use. Once you open the wizard, you specify the SQL Server database to read the data from, and also specify what columns you want to read. The SQL Server 1d6a3396d6

Fund Manager Personal is a finance and business tool specialized in tracking and organizing all your investments and transactions with the aid of graphs and reports. Define a new portfolio You can design a new portfolio using a wizard-like approach. You can enter details about the name, account number and memo, enable online transaction/position retrieval (and give info about the username and password), as well as manually set up your current holdings. What's more, you can add multiple investments, retrieve prices from the Internet for your new investments or manually update the price, select the default cash account, and pick the portfolio location.

Importing/exporting options You are allowed to add prices, transactions and positions from different file formats, such as PRN, QIF, OFX, QFX, or plain text file format. When it comes to exporting data, you can save the information to CSV, QIF or other file format. Generate various types of graphs and reports Fund Manager Personal lets you create all sorts of

---

graphs related to portfolio value, cost, gain and investment overlay, share price, volume, gain, and moving average. Pie charts may also be generated with details about the investment, asset allocation, symbol, currency, and tax status. Reports may include information about the portfolio value, portfolio performance, asset, goal and sector allocation, rebalance, income schedule, monthly performance, and investment transactions. In addition, the tool comes with support for Internet price retrieval, direct Internet transaction retrieval, capital gain calculations (FIFO, AVG or Specific Lot), graph markers and trendlines, multiple currency values, asset allocation, and rebalance holdings. Bottom line All in all, Fund Manager Personal integrates a powerful suite of features which are suitable especially for individual investors. In case you are a professional trader, you can check out Fund Manager Professional, while the Advisor edition can be used by financial advisors, representatives or brokers/dealers. For example, Fund Manager Advisor offers support for trading/analytical options (e.g. technical analysis,

---

risk/reward scatter plots, moving average alerts, real-time quotes, correlation matrix report) and client management functions (e.g. emails with graphs/reports to clients, batch printing, custom logo on reports, executive summary report, invoice report). Many fans of the brand Real Madrid like to become richer when it comes to the football club, so they usually buy other things and get a piece of the action.
