### What's New In?

Guitar and Drum Trainer is an audio editing software application that is intended for the 'average guy' looking for something more than the standard Guitar or Drum Editor or Vocaloid software. The basic edit functions include noise reduction, remove DC (direct current), draw in a keyboard and use a voice/guitar to play a single

---

chord or sequence. If you like the sound of a guitar you can change the tone with an oscillator and the bass/treble with a graphic EQ. You can use a multi-effects device to add reverb, chorus, delay, wah-wah, or dynamics. The really cool part about Guitar and Drum Trainer is that you can edit and arrange up to 8 tracks of audio.
